Abstract—This study focuses on public sentiments and common topics of agriculture in the Philippines, specifically in news platforms and reddit.

Index Terms—component, formatting, style, styling, insert

I. INTRODUCTION

The main intuition in this study is to provide context into what are the common topics and sentiments towards the topic **agriculture** in the Philippines. While it is common knowledge that agriculture is often **unappreciated** and that it is **unsupported**, this study provides a textual analysis on the conversations that occur in online platforms.

A. Research Questions

- 1) What are the dominant public sentiments toward agriculture in the Philippines across Reddit discussions and news articles?
- 2) What are the most common topics associated with Philippine agriculture in public (Reddit) versus formal (news) discourse?
- 3) How do public sentiments and topics differ between the two sources?
- 4) Is it possible to identify the specific needs or concerns of farmers based on these online discussions?

B. Scope & Limitations

- 1) Considering the topic utilizes a discussion-based dataset, the study will not take into account the network structure of the data.
- 2) The analysis is limited to text content and does not incorporate multimedia elements such as images or videos, which may also influence discussions or public perception.

II. METHODOLOGY

Pipeline

- 1) Data Preprocessing

TABLE I
RAW REDDIT DATA SAMPLE

post_title	Sample title about farming
post_url	https://reddit.com/...
comment	Agriculture in the Philippines needs reform.
comment_author	user123
comment_score	12
post_body	Full post discussing rice production and its challenges in the Philippines.
post_score	256
post_author	authorA
created_utc	2025-10-23 08:14:00

TABLE II
ONLINE NEWS PLATFORM DATA SAMPLE

title	Arms to farms: Maguindanao del...
link	https://www.rappler.com/philippines/...
date_published	2025-10-24 09:30:00
author	Maria Dela Cruz
text	COTABATO CITY, Philippines —Maguindanao del...

- 2) Exploratory Data Analysis (EDA)
- 3) Natural Language Processing (NLP)
 - a) Topic Modeling
 - b) Sentiment Analysis

Data Collection & Preprocessing

Reddit data is collected from `r/Philippines`, while agriculture-related news articles are taken from **Rappler**. Metadata that are gathered from both sources are summarized in their respective tables (See Table I & II)

Exploratory Data Analysis

At this stage, basic exploratory data analysis (EDA) methods are going to provide us a deeper understanding of what the data has to offer. (i) Basic Overview and Structure, (ii) Word Frequency Analysis, (iii) Engagement and Metadata Trends, (iv) Common Keywords, (v) Text Comparison (*Reddit vs News, how do they write text?*)

Natural Language Processing

Natural Language Processing

a. Topic Modelling

b. Sentiment Analysis

submission to the conference. Failure to remove the template text from your paper may result in your paper not being published.

III. RESULTS & DISCUSSION

IV. CONCLUSION

V. POSSIBLE FUTURE WORKS

ACKNOWLEDGMENT

Louis G. Binwag III thanks Dr. Noel Victorino for the guidance and support towards the curation of this project.

The preferred spelling of the word “acknowledgment” in America is without an “e” after the “g”. Avoid the stilted expression “one of us (R. B. G.) thanks ...”. Instead, try “R. B. G. thanks...”. Put sponsor acknowledgments in the unnumbered footnote on the first page.

REFERENCES

Please number citations consecutively within brackets [1]. The sentence punctuation follows the bracket [2]. Refer simply to the reference number, as in [3]—do not use “Ref. [3]” or “reference [3]” except at the beginning of a sentence: “Reference [3] was the first ...”

Number footnotes separately in superscripts. Place the actual footnote at the bottom of the column in which it was cited. Do not put footnotes in the abstract or reference list. Use letters for table footnotes.

Unless there are six authors or more give all authors’ names; do not use “et al.”. Papers that have not been published, even if they have been submitted for publication, should be cited as “unpublished” [4]. Papers that have been accepted for publication should be cited as “in press” [5]. Capitalize only the first word in a paper title, except for proper nouns and element symbols.

For papers published in translation journals, please give the English citation first, followed by the original foreign-language citation [6].
